

07th July 2016

Hi,  
I'm Silvio Sangineto,  
User Experience Designer  
who loves **designing for people.**

“In order to get to new solutions, you have to get to know different people, different scenarios, different places”

*Emy Kolawole*

# What is the User Experience Design?

"Design is not just what it looks like and feels like.  
Design is how it works."

**Steve Jobs**  
1955 - 2011

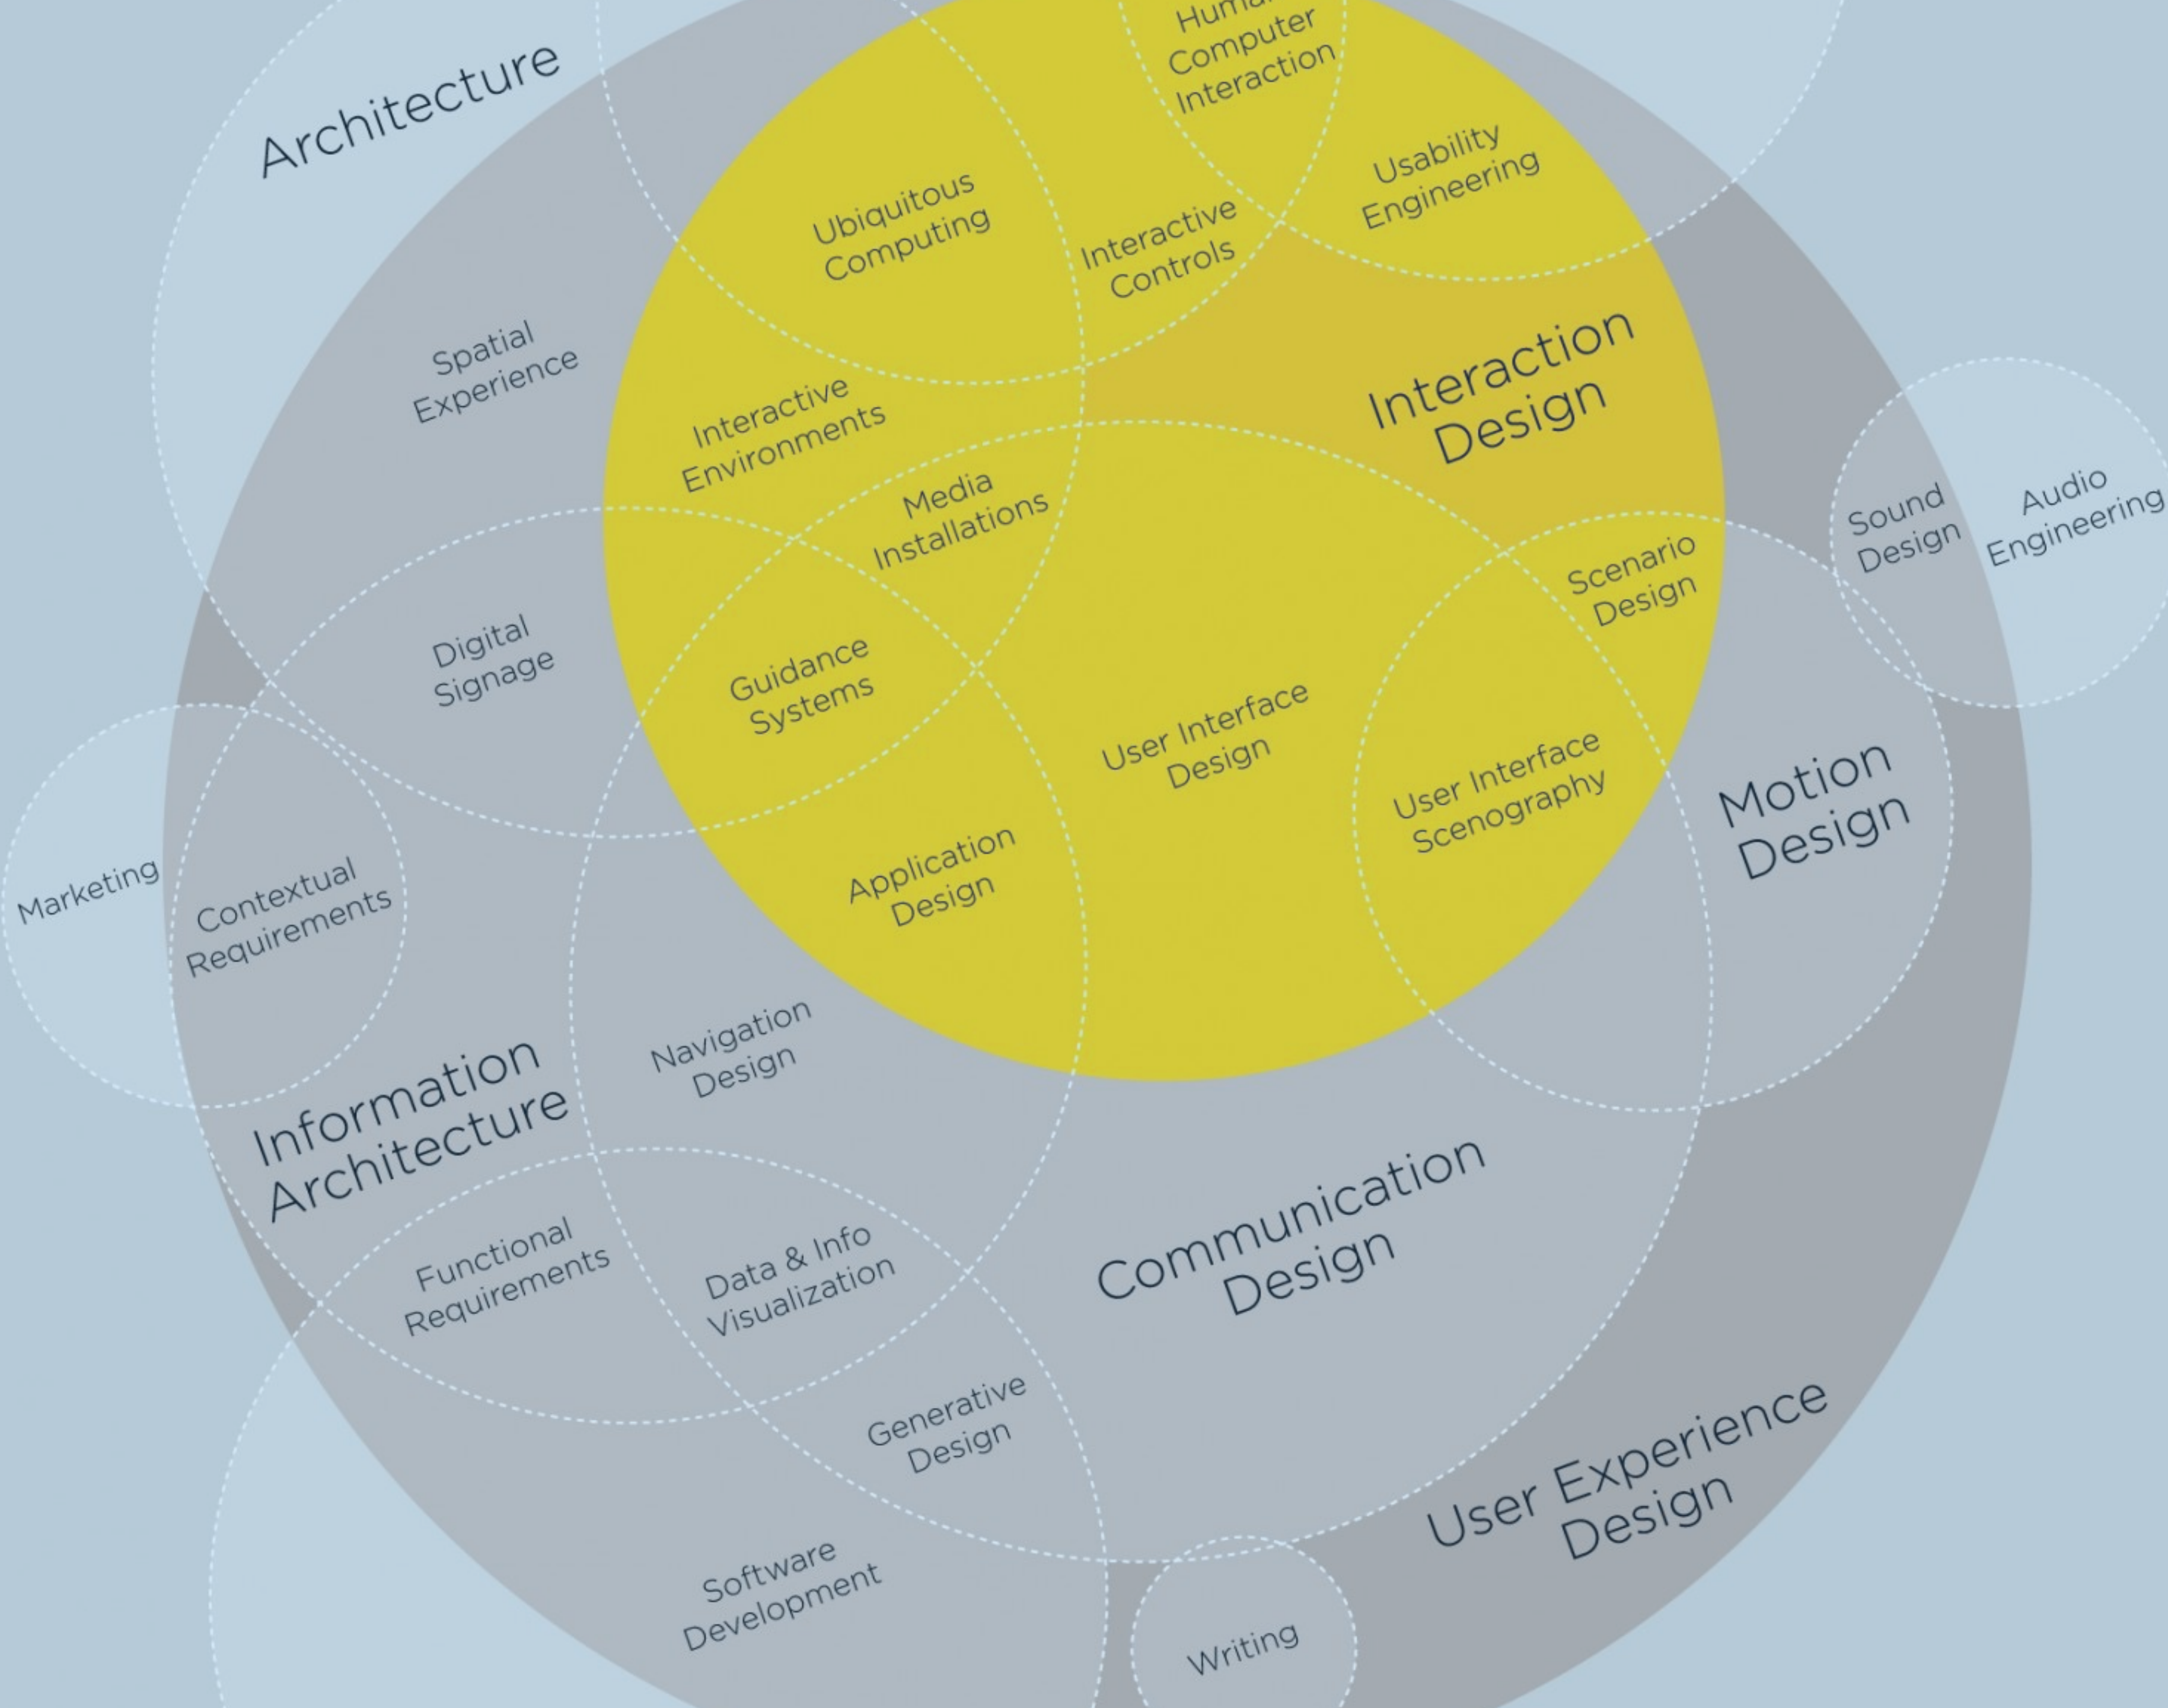

"User experience" encompasses all aspects of the end-user's interaction with the company, its services, and its products.

How big is the UXD ?

Giant Venn Diagram that unites all the disciplines of user experience design.

The User Experience Design is really huge and involves several aspects of relevant topics to design new products or services.

# BREAKING SOME MYTHS

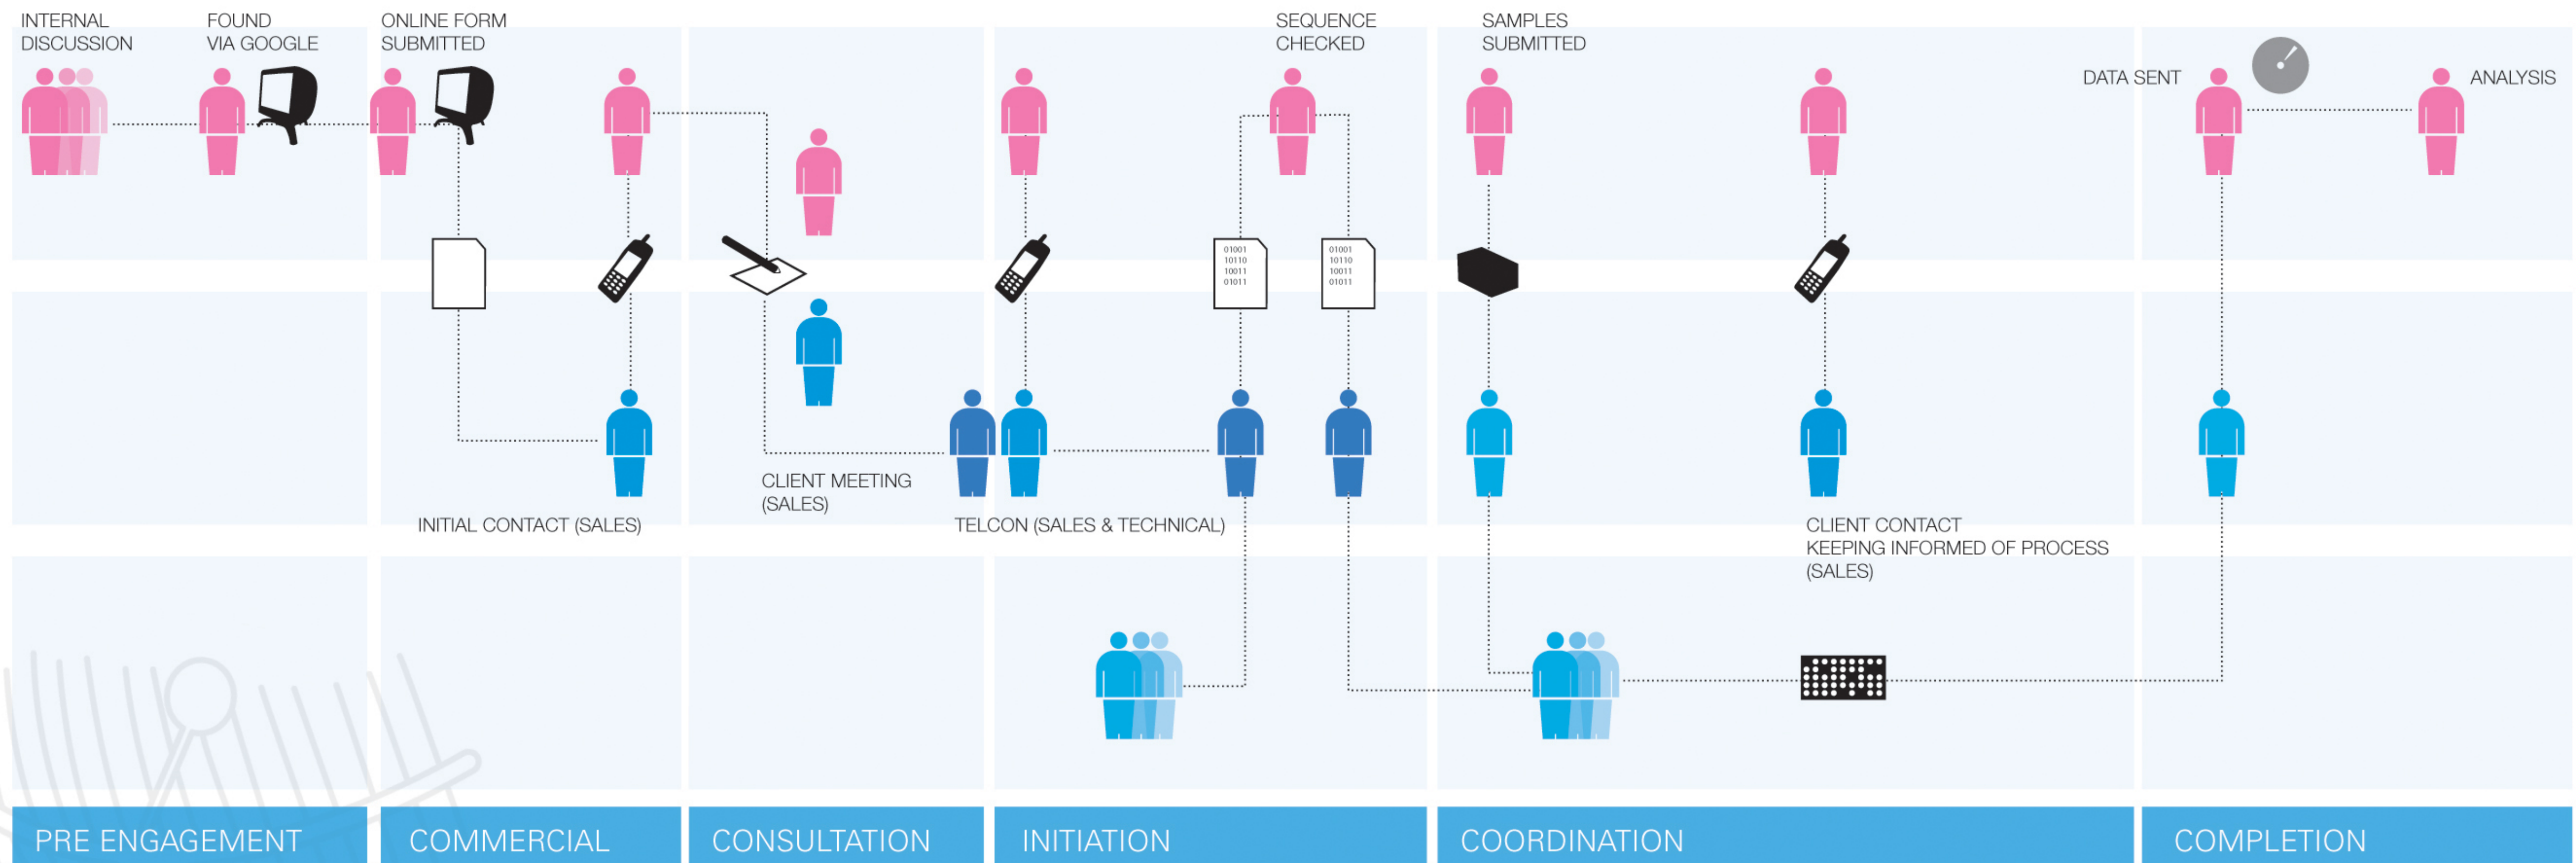

UX = UI

You = Your user

# UX ends when Users leave the screens

# User Experience Elements

**Surface:** brings everything together visually.

**Skeleton:** makes the structure concrete: what components will enable people to use our product ?

**Structure:** gives shape to scope: how will the pieces of the product fit together and behave ?

**Scope:** transforms strategy into requirements.

**Strategy:** what the company is trying to gain from the product ?

# Behind the scene

# INTERVIEW

We ask until we know it all.

# INFORMATION ARCHITECTURE

We create hierarchy and flow.

CREATE FILTER/ EDIT FILTER PAGES.

# WIREFRAMING

We focus on space allocation and prioritization of content, functionalities available and intended behaviors.

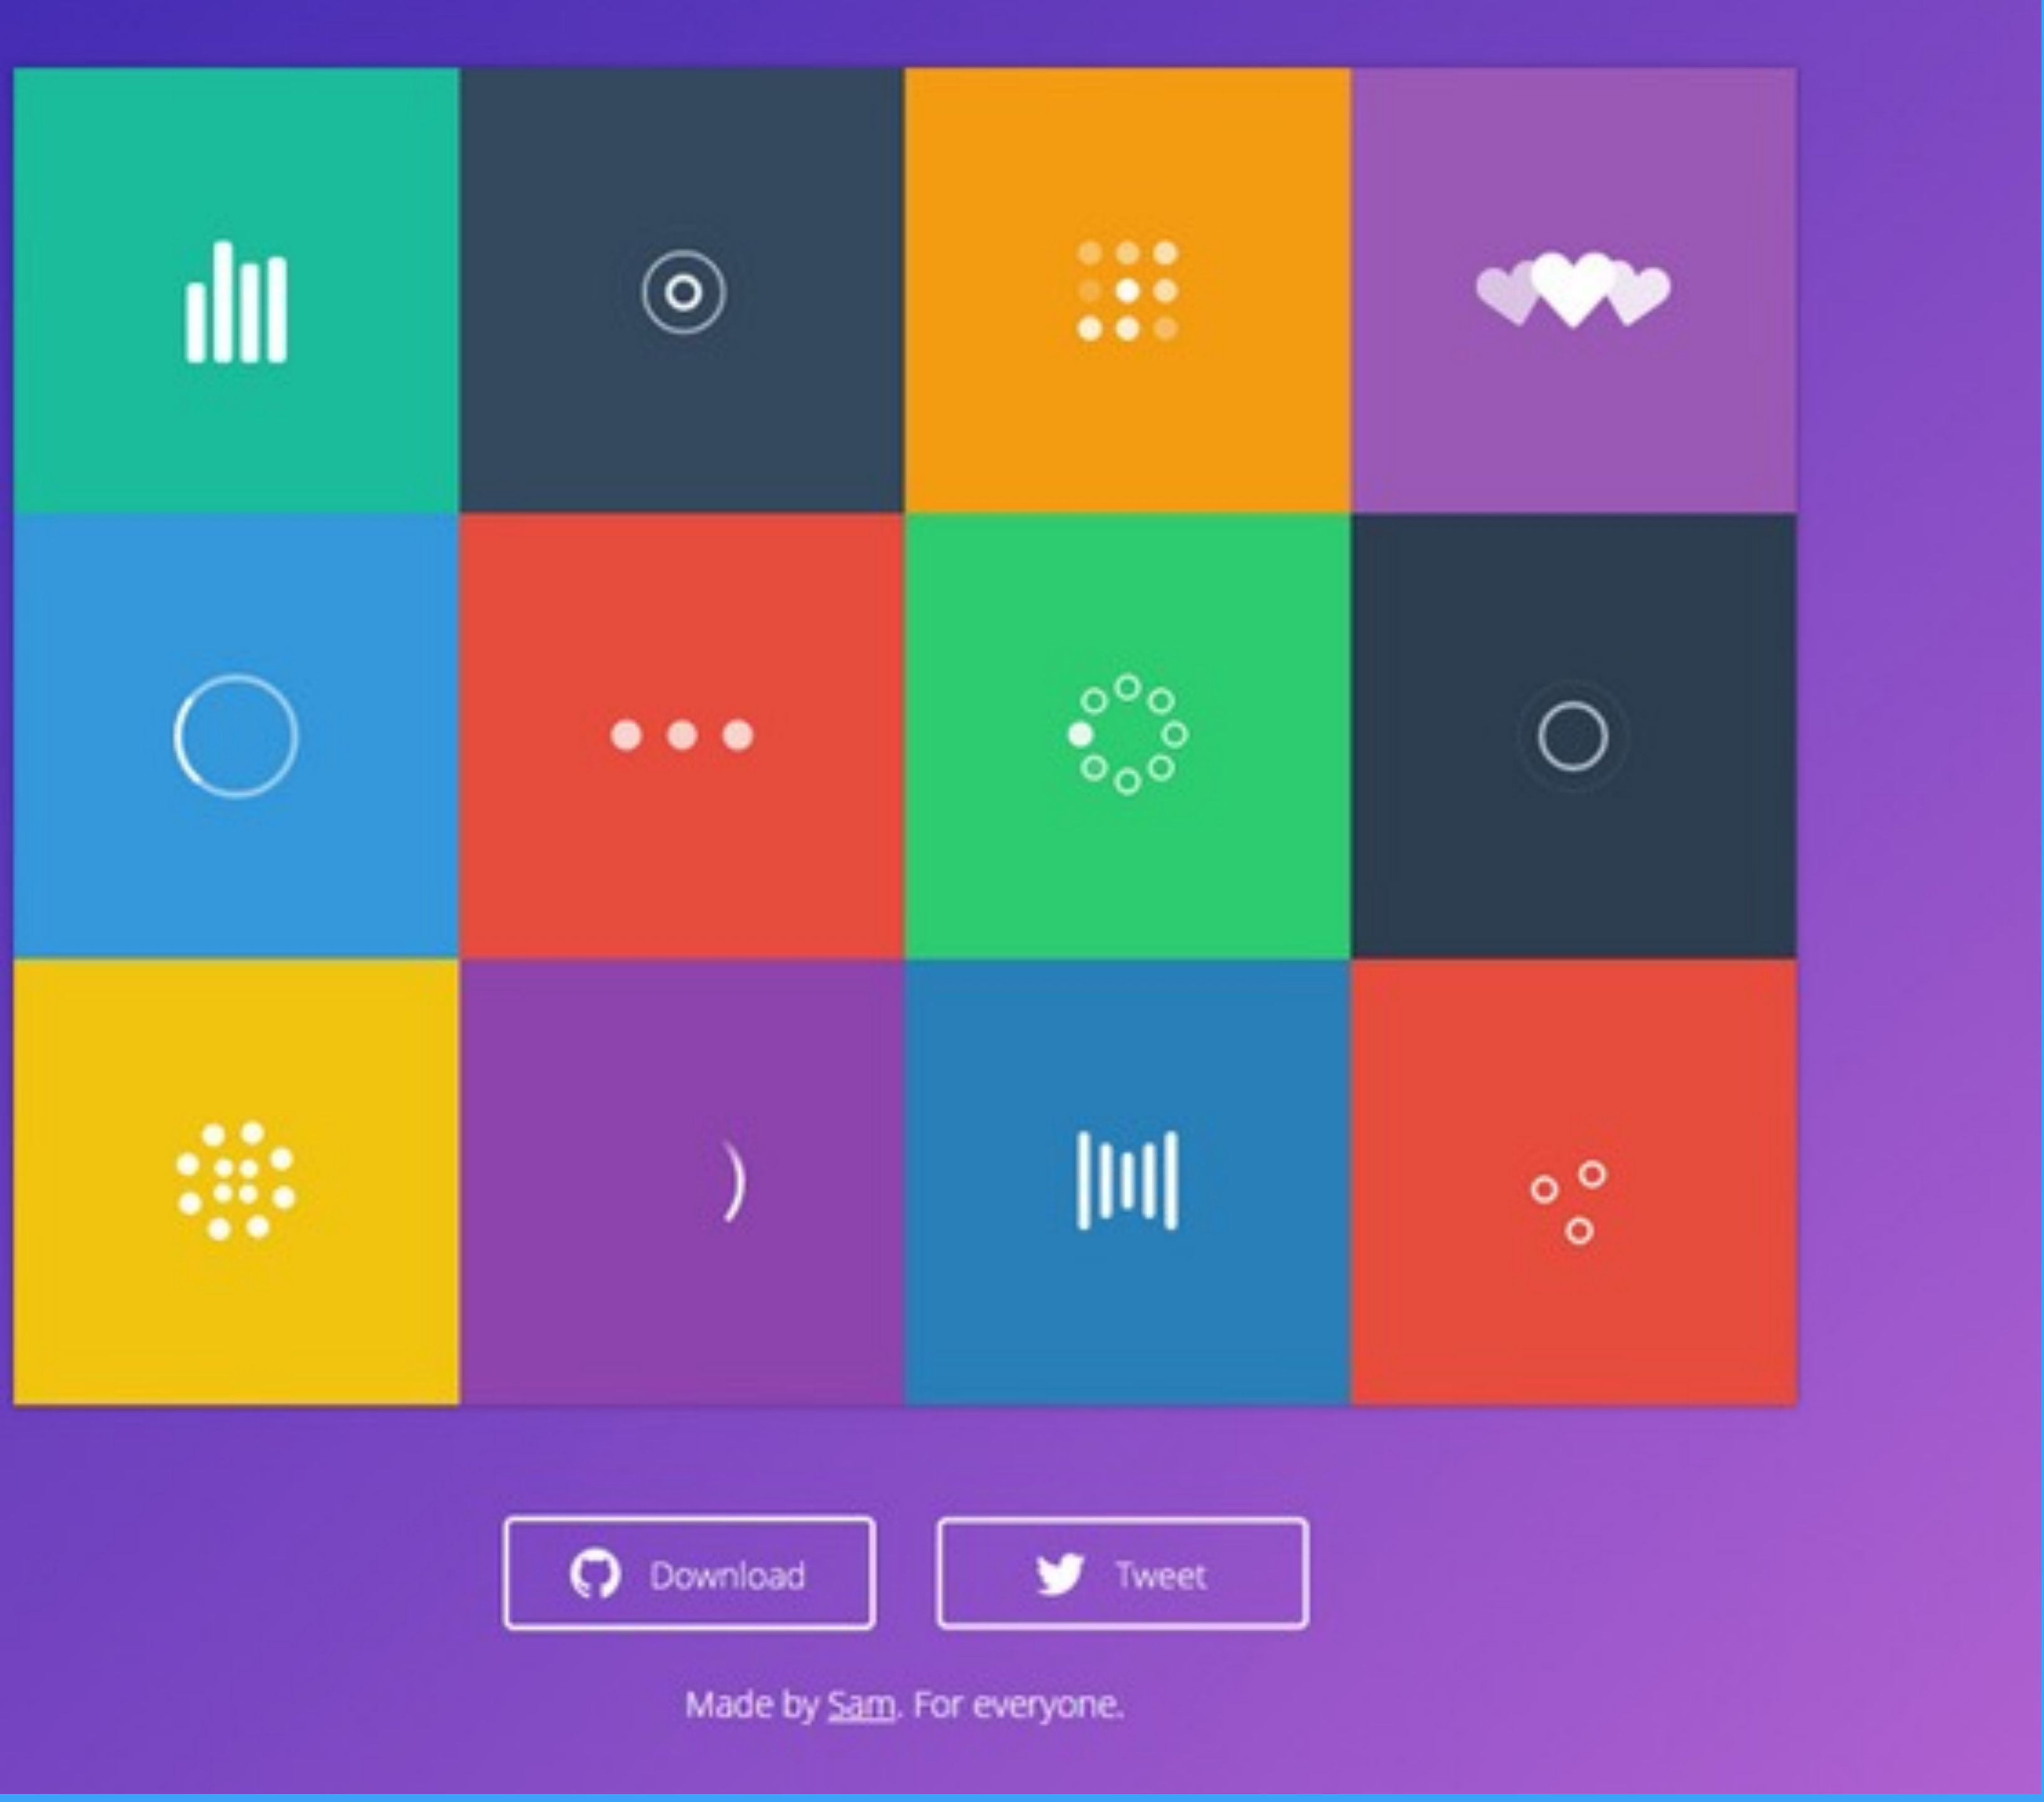

# PROTOTYPING

We show all the interaction flows and gathering insights.

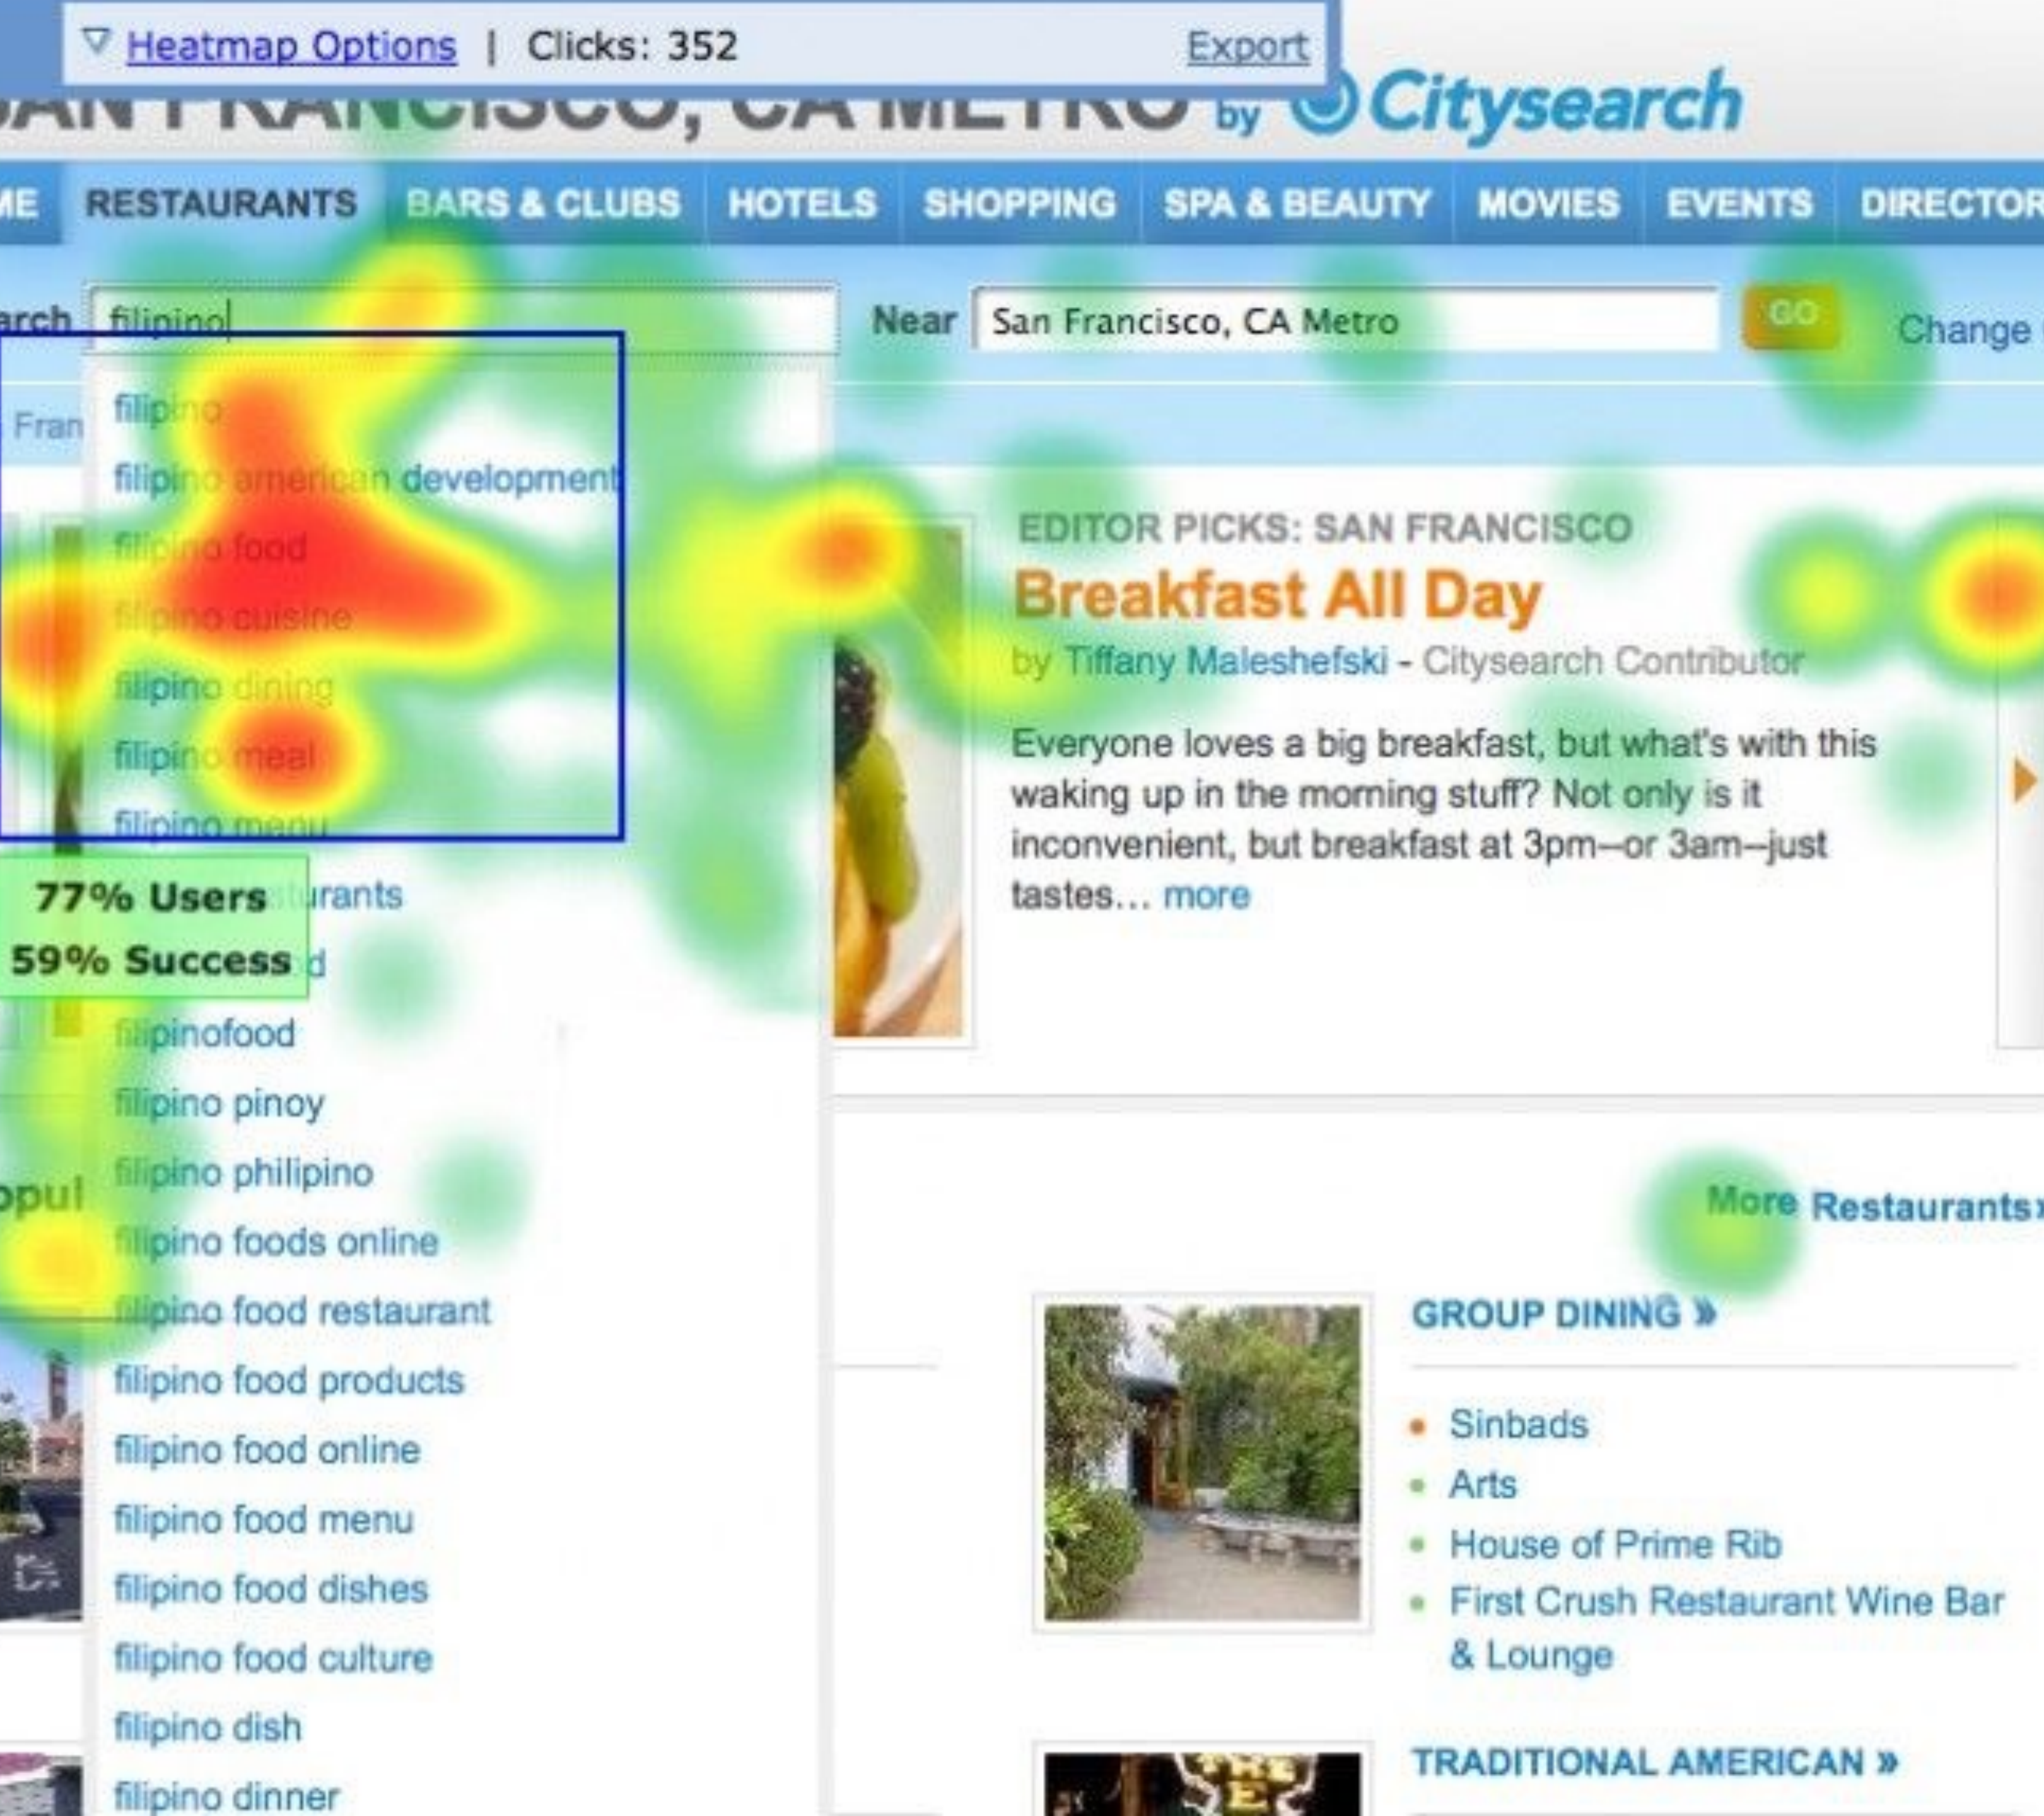

# UI DESIGN

We delight people.

# USER TESTING

We design for people, feedbacks are relevant.

# A technique: Lean UX

# LEAN UX

LEAST TIME TO DELIGHTFUL PRODUCT ✓
